

## FOR IMMEDIATE RELEASE

SentiCon Security Partners with BlackFog to Offer Real-Time Anti-Ransomware Solutions to Its Clientele.

MIAMI — September 10, 2024 — SentiCon Security, a proven cybersecurity consultancy with decades of experience throughout the US, Latin America, and Europe, announced a strategic partnership with BlackFog, the world's leading data privacy and ransomware prevention technology provider. This collaboration enables SentiCon Security to enhance its suite of cybersecurity services with BlackFog's advanced cybersecurity platform, providing unparalleled protection against modern digital threats.

### Revolutionizing Cybersecurity with Proactive Defense Solutions

As cyberthreats become more sophisticated, businesses face unprecedented risks. With the integration of BlackFog's state-of-the-art platform, SentiCon Security will deliver real-time ransomware prevention, data privacy controls, and dark web monitoring capabilities to its clients. BlackFog's patented technology uniquely targets outbound data flow, stopping attacks before they can penetrate or damage networks.

#### Key Benefits of the Partnership:

1. **Ransomware Protection:** Leveraging BlackFog's anti-ransomware technology, SentiCon Security can prevent ransomware attacks from executing, significantly reducing the risk of data hostage scenarios and financial losses.
2. **Dark Web Monitoring:** The enhanced services will now include continuous monitoring of the dark web for any client data leakage, offering an additional layer of protection against identity theft and intellectual property breaches.
3. **Real-Time Threat Detection and Response:** SentiCon will offer real-time threat intelligence powered by BlackFog's machine learning algorithms, allowing immediate identification and mitigation of advanced persistent threats (APTs).
4. **Data Privacy Compliance:** With strict data privacy regulations becoming the norm, BlackFog's compliance features enable businesses to automatically enforce data protection laws like GDPR and CCPA, ensuring clients meet global standards without operational disruptions.

### A Complete Ransomware Solution

"By leveraging the BlackFog platform, we are able to offer a complete solution to our clientele, from proactive consultative services to reactive breach mitigation and identification," said John Masserini, founder of SentiCon Security. "By combining BlackFog's focus on ransomware prevention and detection and SentiCon's real-world experience protecting enterprise infrastructure, we are able to provide a unique service offering to clients of all sizes."

#### About SentiCon Security

SentiCon is a boutique cybersecurity and technology risk mitigation consulting services provider with decades of experience throughout the US, Latin America, and Europe. With a focus on innovative and adaptive technologies, SentiCon delivers tailored security solutions to clients across multiple industries, ensuring comprehensive protection in an ever-evolving threat landscape.

#### About BlackFog

BlackFog is the leader in on-device data privacy, cyber defense, and ransomware prevention. By focusing on the outbound flow of data, BlackFog's technology prevents unauthorized data exfiltration and delivers a proactive defense against modern threats. With a global presence, BlackFog protects businesses from data breaches, ransomware, and cyber espionage.
